

CONTEG[®]
to complete your network

COMPANY PROFILE

**TO COMPLETE YOUR
NETWORK**

CONTEG

INTRODUCING

◆ CONTEG is one of the leading European manufacturers specializing in the development and production of cabinets and racks for telecommunication and data networks.

Dear client,

The company CONTEG is a manufacturer of a wide range of cabinets and racks which fulfill the needs of even the most demanding users. Our solutions include not only free-standing and wall-mounted racks but also a comprehensive range of accessories and value-added services. A constant commitment to improving processes enables CONTEG to meet growing demand and shorten delivery times.

Feedback from our distribution partners in more than 40 countries world-wide indicates that the quality and evolution of CONTEG solutions is highly valued. Our strategy has been to work with our partners, providing solutions, and then delivering top quality products.

I believe that the products bearing the CONTEG logo can stand up to even the closest scrutiny and will satisfy the most experienced and demanding client.

Jan Voláček
General Manager

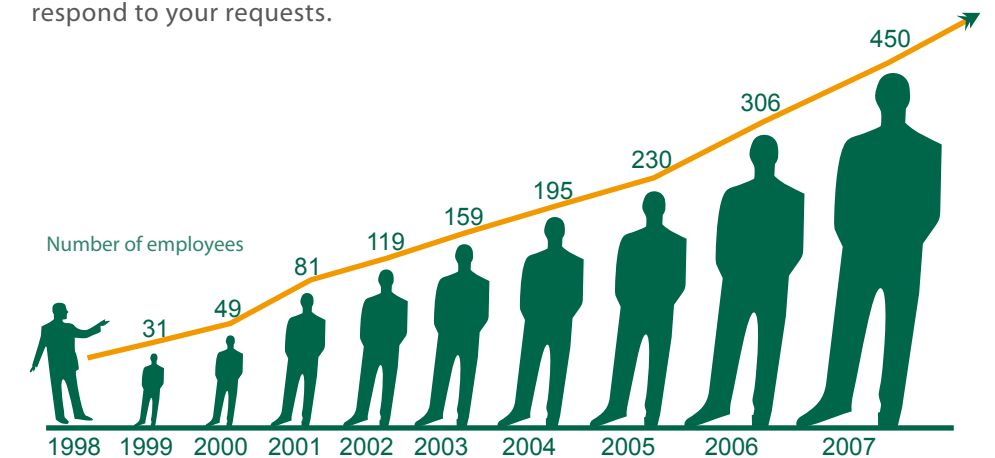

CONSTANT GROWTH

◆ The company origins date back to 1998 when it was formed and since then has become a strong, stable, and forward-looking company. One that is a reliable partner for clients of all sizes.

From beginning to end, the entire production process is done in-house. From concept, design, production, application of final finishes through assembly and packaging all of which are completed at company owned facilities. We have an extensive fleet of superb German TRUMPF CNC machines, as well as a fully automated powder-coating plant.

These modern technologies in connection with the skills and experience of our staff have enabled us to continually increase the efficacy of the production processes and to be able to quickly respond to your requests.

Our manufacturing facilities cover the area of over 20 000 m².

WE SUPPLY COMPLEX SOLUTIONS

WE SUPPLY

- Free-standing racks
- Wall-mounted racks
- SOHO racks
- Open frames
- Rack monitoring systems
- Data centre solutions
- Air-conditioning
- Console LCD/KVM
- Fiber-optic splice boxes
- Ventilation units
- Cable management systems
- Other accessories

Our strategy is to supply innovative products and services with the best ratio between price, utility value, and quality.

To meet the demands of an ever evolving telecommunications and computer industry, we strive to provide a wide range of free-standing and wall-mounted racks along with a complete range of compatible accessories. Apart from standard products, we are ready and able to design a tailor made solution to meet your company unique requirements.

The year 2007 has seen further expansion of our solutions to strengthen our position as one of the leading suppliers of rack/cabinet solutions for data networking. These are namely: systems for air-conditioning and rack monitoring and most importantly a complete solution for data centres. All these solutions have been developed in-house by our design team.

Our goal is to offer you a complete solution in line with our motto „to complete your network“.

FOCUS ON QUALITY

❖ Our strong design group, uncompromising attitude to quality control, and the consistent high grade materials used in every product allow us to deliver highest possible quality.

The secret of our success lies in the strict standards the company adheres to. Not only our ISO and TÜV compliance but also our commitment to continually improving quality, internal standards, and processes.

At the same time, CONTEG requires that our distribution partners also conform to these standards, have a high level of industry experience, and demonstrate a strong background in logistics.

- Our certificates**
- ❖ ISO 14001
 - ❖ ISO 9001
 - ❖ TÜV certificates

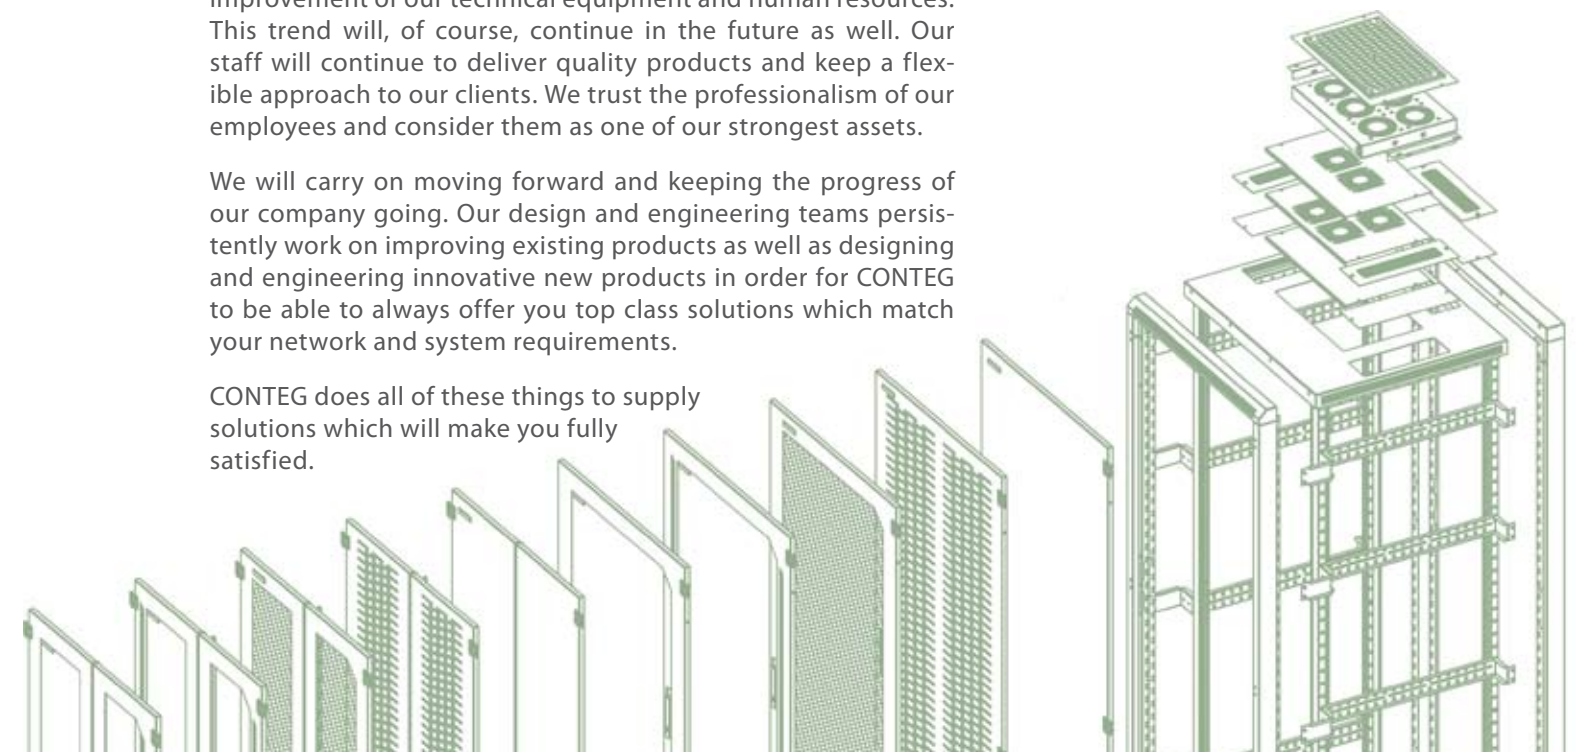

FUTURE

❖ We constantly look towards the future and are working today on tomorrow's solutions.

We understand that to maintain growth we continuously have to work hard to keep our products at a high level and to focus on how best to satisfy our clients' ever changing requirements, therefore CONTEG has been heavily investing in further improvement of our technical equipment and human resources. This trend will, of course, continue in the future as well. Our staff will continue to deliver quality products and keep a flexible approach to our clients. We trust the professionalism of our employees and consider them as one of our strongest assets.

We will carry on moving forward and keeping the progress of our company going. Our design and engineering teams persistently work on improving existing products as well as designing and engineering innovative new products in order for CONTEG to be able to always offer you top class solutions which match your network and system requirements.

CONTEG does all of these things to supply solutions which will make you fully satisfied.
